

Create New Group in the Web Control Center

Overview

ConnectWise Automatel® comes with several default groups; however, you may find that you may need to add extra groups to suit your business needs. Refer to Default Groups for a list of default groups that come pre-configured with an lightle installation.

- Select a group Type from the drop-down. If you are creating a sub-group, the type is inherited from the parent group. Each group type is explained in further detail below.
- The Exclusions (Allows you to create exclusions to limit users from specific computers. Regardless of the settings set on the Groups and Clients tab of the user configuration, if the user is a member of an exclusion group, then all computers in that group are denied to that user. For example, if the technical John Doe has been given access to the group All Agents, then he has access to every agent in Automate. However, if there are select computers that you do not would will be to the computer of the section of the computer of the
